BIOSILTM

TECHNOLOGIES

A close-up, professional studio portrait of a woman with light brown, wavy hair and striking blue eyes. She is wearing dark red lipstick and has a soft, natural-looking complexion. The lighting is dramatic, highlighting her facial features against a dark background. The image is framed with a circular cutout effect on the right side.

PEPTIDES
SILANOLS
SILICONE SPECIALTIES
NATURAL ORIGIN ACTIVES

BioPlex®

Carboxy silicone quats for hair and skin to provide superb conditioning without reducing foam, increase shine and provide thermal protection. Reduces irritation making these ideal ingredients for sensitive skin and scalp applications.

BioPlex® Cetylsil® S-PF - Cetyl Triethylmonium Dimethicone PEG-8 Succinate

BioPlex® Cetylsil® PHS CE - Cetrimonium Carboxydecyl PEG-8 Dimethicone

BioPlex® Cetylsil® Olive CE - Cetrimonium Dimethicone PEG-8 Olivat/Succinate

Biowax®

Silicones designed to detackify and enhance slip & cushion making any formulation more luxurious. Also provides secondary emulsification.

Biowax® 754 Special - PEG-8 Dimethicone

Biowax® Liquid 754 - PEG-8 Dimethicone

Biowax® Liquid D - PEG-8 Dimethicone

Biosil Naturals

Naturally derived ingredients for skin and hair to exfoliate, lighten, moisturize and improve barrier function.

Biosil EFA - Linoleic Acid (and) Linolenic Acid (and) Tocopherol
